An introductory course covering the basic elements of Forensic Medicine. We welcome students of all ages and from all walks of life. A prerequisite for entry into this course is a basic knowledge of medical terms. Students intending to enrol should have a working knowledge of physiology and anatomy or should have completed the Medical Terminology Certificate. A separate brochure is enclosed in this package.

Lectures are delivered in an easy to understand format. There are no assignments or exams. Lecture notes are supplied on CD for download to your laptop or print from your PC. Text book is provided.

This course was established in 1989 and remains unique in Australia. It aims to provide awareness and knowledge of forensics and crime scene investigation. The course is taught by practitioners who have investigated some of Australia’s most notorious murders and deaths.

The course would be of extreme benefit to professional groups such as police, legal practitioners, law court and insurance personnel requiring knowledge of forensic medicine issues. The course is also open to members of the general public who may have an interest in this fascinating subject.

COURSE AIMS
- To provide a basic knowledge of the main medical, scientific and legal concepts and methodology in a forensic setting.
- To provide an understanding of the basic organisational structures in the practice of forensic medicine and science.
- To provide an overview of the multi-disciplinary nature of forensic medicine.

Your textbook is included with the course fee.

about your lecturers

The lecturers delivering the Forensic Medicine course have extensive scientific experience gained from investigating many real-life incidents. They actively participate in numerous professional organisations.

DNA and CASE STUDIES

PROFESSOR PETER GUNN

The application of DNA technology to historical criminal casework will be examined.

We will examine how DNA technology is being used in matters relating to sexual assaults and murders.

We also examine the role of the expert witness in court cases in which complex DNA evidence must be presented clearly to jurors, who often have no scientific background.

CSI - Circumstance Scene Investigation

MIKE HAGAN APM Dip.Crim.

Mike has investigated many major crimes in his 40 years in the NSW Police Force. Ten of those years were spent investigating some of Australia’s most notorious homicides. He was awarded the Australian Police Medal and has a Diploma in Criminology from the University of Sydney. Mike has studied serious and serial crime in the United Kingdom and also America. He is currently a Subject Matter Expert for Senior Detective’s Training in NSW (Hyder). Mike is a production consultant to Australia’s popular television crime series ‘C’rime Investigation Australia’.

The Post Mortem - Understanding what information can be obtained

DR GRANT McBRIE

Dr Grant is a Specialist Pathologist with 30 years experience in autopsy and pathology. Grant is a Fellow of the Royal College of Pathologists of Australasia.

In the late 1980’s Grant was engaged as a Final Investigator at the newly opened Victoria Institute of Forensic Pathology. He has held Forensic positions in Hong Kong, United Kingdom and the United States Armed Forces Division of Pathology Washington D.C.

Grant works closely with the Coroner and as an expert witness when presenting evidence before the Courts.

LATE ENROLMENTS NOT ACCEPTED - ENROLMENT FORM BACK PAGE - FOR FURTHER PARTICULARS PLEASE TELEPHONE (02) 9774 3110

Forensics and CSI is so much more fascinating than what you see on TV.

LATE ENROLMENTS CAN NOT BE ACCEPTED

Course fee: $885

PAYMENT OPTIONS ARE AVAILABLE, PLEASE SEE BACK PAGE FOR DETAILS.

At the closing date for enrolments in this popular course, we traditionally receive an avalanche of students clamouring for placement at the last moment. Quite often, some regrettably have to be turned away as the lecture theatre is booked to capacity.

You must return the enrolment form to The MEDICAL REGISTER of AUSTRALIA before the student intake has reached capacity to avoid disappointment.

Your lecturers are available following lectures to give insights into the broad range of career options that may be available in Forensic Medicine, Science and Policing. They are also available to answer any questions on matters that you wish clarification.

A map showing the location of the lecture theatre will be mailed to you together with your receipt.

Please be aware that in unlikely that there will be an opportunity to alter a post marker.
